EDUCATION

MIT School of Computing — 2022 - 2026

B.Tech. - CSE - Artificial Intelligence & Analytics | CGPA: **6.71** / **10**

12th | Percentage: **67.17** / **100** — 2022

10th | Percentage: **74.80** / **100** — 2020

PROJECTS

Pneumonia Detection Using CNN

Team Size: 4

Key Skills: Keras | TENSORFLOW | Image Processing | CNN

Project Link: https://github.com/adigavhane1013/Pneumonia-Detection-Using-CNN

Developed an automated system for detecting pneumonia from chest X-ray images using a convolutional neural network. Implemented efficient image preprocessing, augmentation, and classification pipelines, achieving reliable pneumonia detection. Built a user-friendly GUI application with Tkinter for real-time image upload and diagnosis visualization, enabling easy use by medical professionals and researchers. Managed end-to-end training, evaluation, and deployment workflows.

Face Recognition-Based Attendance System

Team Size: 3

Key Skills: Opencv | Face Recognition | Multithreading

Project Link: https://github.com/adigavhane1013/Face-Attendance-System

Developed a real-time facial recognition attendance system using OpenCV and face_recognition library. Enabled automated attendance marking with timestamped logs saved as CSV files. Implemented a Tkinter-based GUI supporting multi-threaded video streaming for smooth real-time experience. Features include user registration, attendance record viewing, and data export, designed to facilitate efficient attendance management in educational and office settings.

AI Chatbot Development

Team Size: 2

Key Skills: Python | Hugging Face Transformers | NLP

Project Link: https://github.com/adigavhane1013/AI-Chatbot-Development

Built an intelligent AI-powered chatbot leveraging Hugging Face Transformers to process and respond to natural language queries across various domains. Integrated multiple external APIs including Wikipedia, WolframAlpha, OpenWeatherMap, and News API to provide factual, computational, weather, and news-based information. Developed a modular, API-driven backend paired with a Tkinter GUI for user-friendly real-time interaction and extensibility.

Smart Dustbin Monitoring System Using NodeMCU and IoT

Mentor: PROFESSOR TUSHAR MOTE | **Team Size:** 4

Key Skills: IOT | NODE MCU | REAL TIME MONITORING

Project Link: https://github.com/adigavhane1013/Smart-Dustbin-Monitoring-System-Using-NodeMCU-and-IoT

Designed and implemented an IoT-enabled smart dustbin system that automates lid operation and monitors waste fill levels in real-time via ultrasonic sensors connected to NodeMCU. Developed cloud-based dashboards for centralized visualization and alert generation to optimize waste collection schedules. The system enhances hygiene through contactless disposal and contributes to sustainable waste management by enabling efficient route planning and reducing operational costs.

PUBLICATIONS / RESEARCH / WHITE PAPERS

SMART DUSTBIN MONITORING SYSTEM USING NODEMCU AND IOT — 11 Nov, 2023

IJSREM | **Mentor:** PROFESSOR TUSHAR MOTE | **No. of Authors:** 4

Key Skills: IOT | NODE MCU

ASSESSMENTS / CERTIFICATIONS

AI For Everyone

Aggregate: 86.87 / 100
Authorized by DeepLearning.AI | Offered through Coursera | Verified Certificate
Completed a foundational course designed for non-technical learners to understand the practical implications of Artificial Intelligence in businesses and society. Covered key concepts such as AI strategy, workflow, ethical considerations, and how to identify opportunities to apply AI in real-world scenarios.

AWS Academy Graduate - AWS Academy Cloud Foundations

Aggregate: 98 / 100

Key Skills: AWS | Cloud | IAM | EC2 | Fundamentals

Authorized by Amazon Web Services (AWS) Academy | Offered through AWS Academy | Verified Certificate
Completed a foundational course on cloud computing concepts, services, and core AWS infrastructure. Gained knowledge of global infrastructure, key AWS services (EC2, S3, RDS, IAM), security best practices, and the shared responsibility model. Developed a strong understanding of cloud deployment models, billing, and cost management.

Build Real World AI Applications with Gemini and Imagen

Aggregate: 100 / 100

Key Skills: Google Cloud Platform | gemini | Image Processing | Workbench

Authorized by Google Cloud | Offered through Google Cloud Skills Boost | Verified Skill Badge
Build Real World AI Applications with Gemini and Imagen
Completed an introductory course on building practical AI applications using Google's generative AI tools—Gemini and Imagen. Gained hands-on experience in using pre-trained models for text and image generation, integrating them into real-world workflows, and deploying applications using Vertex AI and Google Cloud services.

Prompt Design in Vertex AI

Aggregate: 100 / 100

Key Skills: Google Cloud Platform | vertex ai | LLM | prompt engineering

Authorized by Google Cloud | Offered through Google Cloud Skills Boost | Verified Skill Badge
Prompt Design in Vertex AI
Completed an introductory course on designing effective prompts for large language models using Vertex AI. Learned techniques for prompt tuning, zero-shot and few-shot learning, and evaluating prompt outputs. Gained practical experience in deploying prompt-based AI solutions for real-world tasks using Google's AI infrastructure.
